\$71.4 million settlement for a client who suffered a traumatic brain injury.

We recently settled a case for one of our clients for \$71.4 million. Our client was catastrophically injured after falling at a new home in Cobb County due to the negligence of a contractor. Although he was not expected to survive the injuries sustained as a result of the fall, our client made a remarkable recovery. He continues to need assistance with his daily activities, however, and thus will truly need this assistance for the remainder of his life. The settlement proceeds will provide for his long-term care needs. We are grateful that we were given the opportunity to make a difference for our client and his family.
